

INTRODUCTION TO INDUSTRIAL MGMT

MCQ- 50

1. **What is the primary definition of management?**
A) The process of maximising profits at any cost. B) The art and science of getting things done through others by efficiently using resources to achieve organisational goals. C) The random allocation of tasks to employees. D) The sole focus on employee welfare without regard to goals. **Correct Answer: B**
2. **Which era in the evolution of management thoughts emphasised intuitive and traditional approaches based on experience rather than systematic methods?** A) Post-scientific era B) Scientific era C) Pre-scientific era D) Modern era **Correct Answer: C**
3. **Frederick Taylor is best known for his contribution to:** A) Hierarchy of needs theory, B) Scientific management and time and motion studies, C) 14 principles of management, D) Theory X and Theory Y. **Correct Answer: B**
4. **The Hawthorne Experiments, conducted by Elton Mayo, primarily highlighted the importance of:** A) Financial incentives in productivity, B) Social factors and human relations in the workplace, C) Motion efficiency in assembly lines, D) Administrative hierarchy in organisations. **Correct Answer: B**
5. **Henri Fayol's contributions to management include identifying:** A) The hierarchy of human needs B) Five functions of management (planning, organising, commanding, coordinating, controlling) and 14 principles of management C) Time and motion studies for bricklaying D) Assumptions about employee motivation under Theory X. **Correct Answer: B**
6. **According to Abraham Maslow's theory, which level of the hierarchy of needs must be satisfied before an individual can focus on higher-level needs like esteem and self-actualisation?** A) Physiological needs B) Safety needs C) Social needs D) Esteem needs **Correct Answer: A**
7. **Management is considered a science, an art, or both?** A) Only a science, because it relies solely on universal principles. B) Only an art, because it involves creativity and personal skill. C) Both a science and an art, as it uses systematic knowledge (science) combined with practical application and intuition (art). D) Neither, as it is purely intuitive. **Correct Answer: C**
8. **Which of the following best describes the social responsibility of managers?-** A) Focusing exclusively on shareholder profits without considering societal impact. B) Ignoring ethical dilemmas to achieve short-term goals. C) Balancing organisational goals with ethical practices,

environmental sustainability, and community welfare (Corporate Social Responsibility) D) Delegating all ethical decisions to employees **Correct Answer: C**

9. **Why does the management process start with planning?**

- A) It ensures immediate action without preparation
- B) It provides a foundation for all other management functions by setting objectives and determining how to achieve them
- C) It focuses only on financial outcomes
- D) It eliminates the need for control

Correct Answer: B

10. **Which of the following is NOT a step in the planning process?**

- A) Setting objectives
- B) Identifying alternatives
- C) Evaluating alternatives
- D) Implementing control measures

Correct Answer: D

11. **What are planning premises?**

- A) Assumptions about future conditions under which plans are made
- B) Final decisions on resource allocation
- C) Detailed employee performance reviews
- D) Control mechanisms for monitoring progress

Correct Answer: A

12. **Which type of planning focuses on long-term goals and broad organisational strategies?**

- A) Operational planning
- B) Tactical planning
- C) Strategic planning
- D) Contingency planning

Correct Answer: C

13. **What is a common barrier to effective planning?**

- A) Clear communication of goals
- B) Lack of flexibility or adaptability to change
- C) Accurate forecasting of resources
- D) Strong leadership support

Correct Answer: B

14. **In McKinsey's 7-S Framework, which element refers to the core beliefs and attitudes shared by the organisation?**

- A) Strategy
- B) Structure
- C) Shared Values

D) Systems

Correct Answer: C

15. What does the SWOT analysis evaluate?

- A) Strengths, Weaknesses, Opportunities, and Threats
- B) Systems, Workflows, Operations, and Trends
- C) Standards, Workforce, Objectives, and Targets
- D) Strategy, Wisdom, Organisation, and Technology

Correct Answer: A

16. What is the relationship between planning and controlling?

- A) Planning sets goals, and controlling ensures they are achieved by monitoring and correcting deviations
- B) Controlling precedes planning to set performance standards
- C) Planning eliminates the need for control
- D) Controlling is unrelated to planning

Correct Answer: A

17. What is the nature of decision-making in management?

- A) A random process without structure
- B) A systematic process of identifying problems, evaluating alternatives, and choosing the best course of action
- C) Solely based on intuition without analysis
- D) Avoiding choices to maintain the status quo

Correct Answer: B

18. Which of the following best describes decision-making under uncertainty?

- A) All outcomes and probabilities are known
- B) Outcomes are known, but probabilities are not fully predictable
- C) Decisions are made without any information
- D) Only one outcome is possible

Correct Answer: B

19. A decision tree is primarily used to:

- A) Assign tasks to employees
- B) Visually map out possible decision paths and their outcomes
- C) Centralise authority in an organisation
- D) Eliminate group discussions

Correct Answer: B

20. What is a key feature of brainstorming in group-aided decision making?

- A) Criticising ideas immediately to filter them
- B) Generating as many ideas as possible without initial judgment
- C) Limiting participation to senior managers

D) Focusing only on one solution

Correct Answer: B

21. **What does delegation in organising involve?**

A) Centralising all decision-making authority

B) Assigning tasks and authority to subordinates while retaining accountability

C) Eliminating all responsibility from managers

D) Ignoring employee empowerment

Correct Answer: B

22. **What is the difference between centralisation and decentralisation?**

A) Centralisation distributes decision-making authority widely, while decentralisation concentrates it

B) Centralisation concentrates decision-making at higher levels, while decentralisation distributes it to lower levels

C) Both involve equal distribution of authority

D) Neither involves decision-making authority

Correct Answer: B

23. **What is departmentation in the context of organising?**

A) The process of grouping activities into units based on functions, products, or other criteria

B) The elimination of all organisational structure

C) The delegation of all tasks to external agencies

D) The concentration of all authority in one department

Correct Answer: A

24. **What is a common reason for resistance to organisational change?**

A) Clear communication of change benefits

B) Fear of the unknown or loss of job security

C) Complete employee involvement in planning change

D) Excessive rewards for adapting to change

Correct Answer: B

25. **Which model of managing organisational change emphasises gradual, continuous improvement?**

A) Lewin's Change Model

B) Kotter's 8-Step Model

C) Incremental Change Model

D) Action Research Model

Correct Answer: C

26. **What is the primary purpose of manpower planning in staffing?**

A) To reduce employee morale

B) To forecast future human resource needs and ensure the right number and type of employees

C) To eliminate recruitment processes

D) To focus only on short-term hiring

Correct Answer: B

27. Which of the following is a key component of job design?

A) Ignoring employee skills and preferences

B) Structuring tasks to enhance efficiency, satisfaction, and productivity

C) Centralising all tasks to one employee

D) Eliminating job roles entirely

Correct Answer: B

28. What is the difference between recruitment and selection?

A) Recruitment is attracting candidates, while selection is choosing the best candidate for the job

B) Recruitment is training employees, while selection is appraising performance

C) Both are identical processes

D) Recruitment is a performance appraisal, while selection is hiring

Correct Answer: A

29. What is the main goal of training and development in an organisation?

A) To reduce employee retention

B) To enhance employee skills, knowledge, and performance to meet organisational goals

C) To limit employee growth opportunities

D) To focus only on managerial promotions

Correct Answer: B

30. Performance appraisal is primarily used to:

A) Demotivate employees by highlighting only weaknesses

B) Evaluate employee performance, provide feedback, and guide future development

C) Avoid any feedback to employees

D) Replace recruitment processes

Correct Answer: B

31. According to motivation theories, what is a key factor in motivating employees toward organisational objectives?

A) Ignoring employee needs and goals

B) Aligning individual goals with organisational objectives through incentives and recognition

C) Reducing all forms of rewards

D) Focusing only on financial penalties

Correct Answer: B

32. Which of the following is a non-financial motivator that can enhance employee satisfaction?

- A) Bonuses and salary increases
- B) Recognition, autonomy, and opportunities for growth
- C) Overtime pay
- D) Stock options

Correct Answer: B

33. How does morale building contribute to organisational success?

- A) By creating a negative work environment
- B) By fostering a positive work culture, increasing employee engagement, and improving productivity
- C) By reducing employee interaction
- D) By eliminating performance appraisals

Correct Answer: B

34. What is the primary role of leadership in an organisation?

- A) To avoid decision-making responsibilities
- B) To inspire, guide, and influence employees toward achieving organisational goals
- C) To focus solely on administrative tasks
- D) To delegate all tasks without oversight

Correct Answer: B

35. Should managers also act as leaders?

- A) No, managers should only focus on planning and controlling
- B) Yes, managers should lead by motivating and guiding teams while managing tasks
- C) No, leadership is irrelevant to managerial roles
- D) Yes, but only in small organisations

Correct Answer: B

36. Which leadership style involves making decisions without consulting subordinates?

- A) Democratic leadership
- B) Autocratic leadership
- C) Laissez-faire leadership
- D) Transformational leadership

Correct Answer: B

37. What is a key focus of leadership development programs?

- A) Reducing employee involvement
- B) Enhancing skills like decision-making, emotional intelligence, and communication for effective leadership
- C) Focusing only on technical skills
- D) Eliminating the need for teamwork

Correct Answer: B

38. Which leadership behaviour emphasises building relationships and supporting team members' well-being?

- A) Task-oriented behaviour
- B) Relationship-oriented behaviour
- C) Autocratic behaviour
- D) Transactional behaviour

Correct Answer: B

39. What is the first step in the communication process?

- A) Decoding the message
- B) Encoding the message by the sender
- C) Receiving feedback
- D) Selecting the communication channel

Correct Answer: B

40. How can tools like feedback and active listening help bridge communication gaps?

- A) By creating misunderstandings
- B) By ensuring clarity, understanding, and effective exchange of ideas
- C) By limiting communication to written formats
- D) By avoiding direct interaction

Correct Answer: B

41. What is a key advantage of using electronic media in organisational communication?

- A) It slows down communication processes
- B) It enables fast, efficient, and widespread dissemination of information
- C) It eliminates the need for feedback
- D) It restricts communication to face-to-face interactions

Correct Answer: B

42. What is the primary concept of Computer-Integrated Manufacturing (CIM)?

- A) Manual control of all manufacturing processes
- B) Integration of computer-based systems to automate and streamline manufacturing processes
- C) Elimination of all computer systems in production
- D) Focus solely on product design without automation

Correct Answer: B

43. Which of the following is a key component of CIM?

- A) Employee training programs
- B) Computer-Aided Design (CAD) and Computer-Aided Manufacturing (CAM)
- C) Manual assembly lines

D) Traditional inventory management

Correct Answer: B

44. What is a major challenge in implementing CIM systems?

A) Low initial investment costs

B) High costs and complexity of integrating diverse systems

C) Minimal need for skilled personnel

D) Lack of technological advancements

Correct Answer: B

45. Which process in CIM involves the use of computers to control machine tools and production equipment?

A) Computer-Aided Design (CAD)

B) Computer-Aided Manufacturing (CAM)

C) Enterprise Resource Planning (ERP)

D) Material Requirements Planning (MRP)

Correct Answer: B

46. What is a critical step in the implementation of CIM?

A) Avoiding integration of departments

B) Ensuring interoperability and data sharing among all systems and departments

C) Limiting automation to one department

D) Ignoring employee training

Correct Answer: B

47. Which of the following is a benefit of CIM in modern manufacturing?

A) Increased manual labour requirements

B) Improved efficiency, reduced production time, and enhanced product quality

C) Higher defect rates in production

D) Reduced flexibility in manufacturing processes

Correct Answer: B

48. Which CIM component focuses on managing the flow of materials and resources in production?

A) Computer-Aided Design (CAD)

B) Manufacturing Execution Systems (MES)

C) Customer Relationship Management (CRM)

D) Quality Control Systems

Correct Answer: B

49. What role does Enterprise Resource Planning (ERP) play in CIM?

A) It designs product prototypes

B) It integrates business processes like inventory, procurement, and

production planning

C) It controls machine tools directly

D) It eliminates the need for automation

Correct Answer: B

50. How does CIM contribute to flexibility in manufacturing?

A) By restricting production to a single product type

B) By enabling rapid changes in production processes to meet market demands

C) By increasing manual intervention in production

D) By reducing the use of computer systems

Correct Answer: B

SHORT QUESTIONS- 25

1. **Define Management according to a scientific approach.**
2. **What are the key characteristics of the pre-scientific era in management thought?**
3. **What was F.W. Taylor's main contribution to management?**
4. **What key insight came from Elton Mayo's Hawthorne Experiments?**
5. **Is management a science or an art?**
6. **What is the role of social responsibility in management?**
7. **Why does the management process start with planning?**
8. **What are planning premises?**
9. **What is the difference between strategic and operational planning?**
10. **What is a common barrier to effective planning?**
11. **What is McKinsey's 7-S Framework?**

12. What is the relationship between planning and controlling?
13. What is the nature of decision-making in management?
14. How does decision-making under uncertainty differ from decision-making under certainty?
15. What is the purpose of a decision tree in decision-making?
16. What is the role of brainstorming in group-aided decision making?
17. What is the concept of delegation in organising?
18. What is the difference between centralisation and decentralisation in organising?
19. Why does resistance to organisational change occur?
20. What is the purpose of manpower planning in staffing?
21. How does motivation contribute to achieving organisational objectives?
22. What is the role of leadership in an organisation?
23. How does electronic media communication benefit an organisation?
24. What is the primary concept of Computer-Integrated Manufacturing (CIM)?
25. What is a key benefit of Computer Integrated Manufacturing (CIM) in modern manufacturing?

DESCRIPTIVE QUESTION- 15

1. Describe the evolution of management thoughts, comparing the pre-scientific and post-scientific eras, with specific reference to the contributions of Taylor and Fayol.
2. Explain the significance of Elton Mayo's Hawthorne Experiments and Abraham Maslow's hierarchy of needs in shaping modern management practices.

3. **Discuss whether management is a science or an art, and elaborate on the role of ethics and social responsibility in managing.**
4. **Why does the management process start with planning, and what are the key steps involved in the planning process?**
5. **Explain the concept of strategic planning and McKinsey's 7-S Framework, and how they contribute to effective organisational management.**
6. **Discuss the planning-control relationship and the process of control, including how human responses to control can impact its effectiveness.**
7. **Explain the nature and process of decision making, including how decision making under certainty differs from decision making under uncertainty.**
8. **Describe the concept and process of organising, including the roles of delegation, empowerment, and the distinction between centralisation and decentralisation.**
9. **Discuss the concept of organisational change, reasons for resistance to change, and one model for managing organisational change effectively.**
10. **Explain the concept of manpower planning and its relationship with recruitment, selection, and job design in the staffing process.**
11. **Discuss the role of motivation, performance appraisal, and morale building in achieving objectives..**
12. **Define leadership and its role in an organisation, and discuss whether managers should also act as leaders, with reference to different leadership styles.**
13. **Explain the communication process and how tools like feedback and electronic media can bridge communication gaps in organisations.**
14. **Explain the basic concept of Computer Integrated Manufacturing (CIM) and its key components, highlighting how they contribute to modern**

manufacturing.

- 15. Discuss the challenges and benefits of implementing Computer Integrated Manufacturing (CIM) in modern manufacturing environments.**

Computer Science (Questions to prepare for semester)

Part –C

1. Analyze decision-making process under risk and uncertainty.
2. Analyze organization communication process and barriers to effective communication
3. Discuss various leadership styles and their effectiveness.
4. A bank implemented a digital workflow system replacing paper-based operations. Senior employees strongly resisted the change and complained about lack of training.
Analyze reasons for resistance to change.
Explain strategies management should adopt to reduce resistance.
5. A textile factory introduced higher incentives to workers expecting increased production. However, absenteeism increased and productivity fell sharply. Employees complained about excessive pressure and poor coordination among supervisors.
Analyze the situation using Human Relations and Scientific Management approaches.
Suggest managerial measures to improve productivity and morale.
6. Analyze communication distortion in organization hierarchy.
7. Explain the Hierarchy of needs theory of human motivation proposed by Abraham Maslow.
8. Discuss the various types of Organizational Structures with appropriate diagrams.
9. Discuss in details the steps in an Employee Selection Process
10. What are the various external and internal recruitment sources? Elaborate on them.
11. Classify the various planning process undertaken in an organization.
12. Explain the barriers to effective planning.
13. Explain the contribution of Elton Mayo in modern management.
14. Explain the contribution of Henry Fayol in modern management.
15. Illustrate the contribution of Frederick Winslow Taylor to Modern Management.

Part –B

1. What are various on the job and off the job training programs?
2. Analyze decision-making process under risk and uncertainty.
3. A firm ignores ethical concerns for profit. Evaluate long-term consequences.
4. Discuss the theory of Motivation by Douglas McGregor in brief
5. What are the outcomes of Hawthorne experiments?
6. Explain MBO and its advantages.
7. Explain the organization communication process with a neat diagram.
8. A decentralized firm faces coordination issues. Analyze structural challenges.
9. Illustrate the example of feedback in organizational communication.
10. Why recruitment is considered a positive process but selection a negative process?
11. Differentiate between Job Description and Job Specification?
12. What do you mean by "departmentation" in an organization, and what are its advantages?
13. Compare centralization and decentralization with examples.
14. High incentives reduce employee creativity. Do you agree or disagree with this, and why do you say so?
15. Differentiate between authority, responsibility, and accountability with examples.
16. Differentiate between strategic planning and operational planning with suitable examples.
17. Analyze the limitations of planning in a highly uncertain business environment.

18. Explain the importance of ethics in managerial decisions.
19. What are the various managerial roles as stated by Mintzberg ?
20. What are the managerial qualities according to Henry Fayol?
21. Explain the terms "unity of command" and "unity of direction."
22. What are the basic five functions of Management?
23. Explain why management is both an art and a science with examples.
24. Explain SWOT analysis with a real-life application.
25. What are the 5Ms of Management?
26. Differentiate between Management and Administration

Please consult Batch II and Batch III Class Representatives for the other 2 sets. You can find many common /overlapping questions. All the questions for final will be from these three sets only.

Share this suggestion with other two batches and collect their suggestion and circulate at your unofficial group too.
