

Java Important Exam Questions

1. What are the features of Java HashMap?
2. Differentiate between ArrayList and LinkedList.
3. What is Collection Framework in Java? Explain with example.
4. What are the main differences between Array and Collection?
5. Explain ActionListener with example.
6. Explain ActionListener Interface with example.
7. What are the differences between creation of a user thread by extending Thread class and implementing Runnable interface?
8. Write a Java program where multiple threads perform multiple tasks.
9. What are the advantages of multithreading?
10. Differentiate between sleep() and wait() method.
11. Write a Java program where main thread and child thread run simultaneously.
12. Write a Java program to handle multiple exceptions using nested try block.
13. Write a program to calculate percentage of a student for 3 different subjects and create an exception if marks entered are greater than 100.
14. Explain life cycle of thread with diagram.
15. Show different types of exceptions in Java (negative number exception).
16. Write a program to calculate volume of a sphere and cone using interface Shape.
17. Explain the use of final keyword in Java.
18. Write a Java program to create user defined package and subpackage.
19. Explain Dynamic Method Dispatch with example.
20. Write an interface program to calculate child height from parents' height.
21. Explain super keyword with example.
22. Explain constructor inheritance with example.
23. Write a program to find area of square, rectangle and triangle using parameterized constructor.
24. Explain Array of Objects with example.
25. Write a program to compare two strings using ==, compareTo() and equals() method.
26. Explain Polymorphism with example.
27. Write a program to find higher salary using OOP approach and accessor method.
28. Explain static keyword and its uses.
29. What is Event Handling in Java?
30. Explain MouseListener with example.
31. Explain Java Collection Framework and state four main types of collection interfaces.
32. Differentiate between ArrayList and Vector.
33. Differentiate between Array and Collection.
34. Differentiate between throw and throws.

35. Differentiate between final, finally and finalize keywords.
36. Show example of multiple catch block and nested try block.
37. How to change priority of thread? Explain with example.
38. Explain Thread Synchronization with example.
39. When should we choose abstract class and when should we choose interface?
40. Differentiate between super keyword and this keyword.
41. Write a program showing multiple inheritance using extends and implements.
42. Why multiple inheritance is not supported in Java? How is it overcome?
43. Differentiate between overloading and overriding.
44. What is mutable string? Difference between String and StringBuffer.
45. Write a program for method overloading.
46. Explain use of inner class with example.
47. Write a short note on JVM.
48. Explain Array of Objects with program.
49. Characteristics of OOP language.
50. Write a program using command line argument to find maximum number.
